

LOAD STOPPING TOOL 100% BRAZILIAN

*Brazil's first device designed to open energized switches,
homologated by the main Brazilian Electrical Utilities.*

Portable Device for opening energized switches. Light-weight, practical and efficient in extinguishing the electrical arc when opening knife and fuse switches. Two models are available: one for 24.5kV switches and another for 34.5kV switches.

Nominal current: 600A or Maximum current: 900A.

Both models are supplied with an automatic operations marker and a universal fitting for conventional and telescopic Hot Stick, tested according to IEC 62271-103 international standard.

Both models are supplied in our original high strength polymer case, for conditioning and transport purposes.

24.5kV LOAD-STOPPING TOOL
WITH AUTOMATIC
OPERATIONS MARKER
