

Transparent Rubber Insulating Blanket

TRANSPARENT INSULATING RUBBER BLANKET

Orion transparent insulating blanket is manufactured in special rubber, based on the ASTM 1048 standard. It guarantees high transparency and allows users to correctly insulate and easily view all energized contacts. It offers, in addition to flexibility, different classes of insulation and is suitable for panels, fuses, switches, cables, circuit breakers, energized cubicles and other applications.

The marking contains the following indications:

- Manufacturer's name;
- Serial number;
- Maximum usage voltage;
- Type;
- Class.

TECHNICAL SPECIFICATIONS OF RUBBER INSULATING BLANKET

CLASS	ALTERNATING CURRENT		COLOR TAG	SIZES	
	TEST VOLTAGE (VOLTS)	MAXIMUM USE VOLTAGE (VOLTS)		THICKNESS (mm)	WIDTH X LENGTH (mm)
00	2.500	500	BEIGE	0,6 a 1,0	600 x 800 800 x 1.000
0	5.000	1.000	RED	1,6 a 2,2	900 x 2.100

IMPORTANT

Never store your transparent blankets or your kit together with other rubber products, as these may contain chemical agents that cause stains or yellowing of the blanket.
