

DPP-30

High voltage phase tester, made in Japan

Auto power on function

**For main electrical
circuit and for battery
function checking
in power-on**

Telescopic rod

Wireless connection

Developed by

**Central power
grid in Japan**

**Multi
Measuring
Instruments**

Voltage range	AC20 ~ 34.5kV
Frequency	50 and 60 both of Hz
Application	Phase indication: Different phase> continuity beeping and flashing In phase> Non beeping and flashing Phase rotation :Flashing indication for positive and reverse phase
Indication	Continuity beeping and flashing
Flashing	Confirmable by 8000lx illuminance
Beeping	More than 50dB away from 2m
Withstand voltage	AC70kV/1min(Detecting hook ~ handle)
Power Supply	R6P 1.5V Battery*4
Dimension	2090mm
Weight	Approx.2500g

MULTI

Established. 1986, Tokyo
